

Step 1: Logine to Amazon EC2

Step 2: Click on launch an instance

Step 3: • Choose AMI: Amazon Linux 2023

- Instance Type: t2.micro (Free tier eligible)
- Configure Security Group: Allow SSH (port 22) and HTTP (port 80)
- Create a new key pair RSA and .pem key pair and downloade it
- Launch the instance

Step 4: click on connect to instance

Step 5: Click on Connect

Step 6: sudo yum install httpd -y

Step 7: sudo systemctl start httpd / sudo systemctl start httpd

Step 8: sudo systemctl enable httpd

Step 9: sudo systemctl status httpd

Step 10: cd /var/www/html

Step 11: sudo nano index.html

Step 12: <!DOCTYPE html>

        <h2>About Me</h2>
        <p>
            Hello! My name is Parth Gulhane. I am a Computer Engineering student
            passionate about cloud computing, web development, programming,
            event management, and technology communities.
        </p>
```

<p>

I have experience managing technical events, science fairs,  
and GDG activities with large audiences. I also enjoy learning  
new technologies and building real-world projects.

</p>
