

Step 1: logine to Trailhead Selesforce and open dashboard

Step 2: Go to Hands-on Orgs and Create Playground and click launch it

Step 3: Go to Setup -> App Manager -> New Lightning App App

Name → Student Management App

Step 4: **Add Navigation Items**

Add:

- Accounts
- Contacts

☞ Click **Next → Save & Finish**

Step 5: Click on Setup

In setup Search for Object Manager and click it

Click Create -> Custom Object

Step 6: Label → Student

- Plural → Students
- Record Name → Student Name
- ✓ Tick: • Allow Reports
- Allow Activities Click Save

Step 7: Create Fields Navigate to Fields & Relationship inside Student object and create:

Field Name Type

Roll Number Numbers

Course Text

Marks Numbers

Email Email

E STEP: setup -> Object Manager -> Create -> Custom Object

Field	Value
Label	Subject Mark
Plural	Subject Marks
Record Name	Subject Name

Save

Inside Subject Mark object

Go to:

🔗 Fields & Relationships → New

Choose:

🔗 **Master-Detail Relationship**

Click:

🔗 Next

◇ **Related To**

Select:

🔗 Student

Click:

🔗 Next → Next → Save

Fields & Relationships → New

Text -> Subject

Number -> Marks

Step 8: Do to setup -> Developer Console

File → New → Apex Class

- Name: StudentController

Paste code

```
public class StudentController {
```

```
    public static void addStudent(String name, Integer roll, String course, Integer marks) {
```

```
        Student__c s = new Student__c();
```

```
        s.Name = name;
```

```
        s.Roll_Number__c = roll;
```

```
        s.Course__c = course;
```

```
        s.Marks__c = marks;
```

```
        insert s;
    }

}
```

OR

```
public class StudentController {

    // Add Student
    public static Id addStudent(String name, Integer roll, String course) {

        Student__c s = new Student__c();

        s.Name = name;
        s.Roll_Number__c = roll;
        s.Course__c = course;

        insert s;

        return s.Id;
    }

    // Add Subject Marks
    public static void addSubjectMarks(Id studentId, String subject, Integer marks) {

        Subject_Mark__c sm = new Subject_Mark__c();

        sm.Student__c = studentId;
        sm.Name = subject;
        sm.Marks__c = marks;
    }
}
```

```
        insert sm;
    }
}
```

Debug → Open Execute Anonymous Window

Paste: StudentController.addStudent('Parth', 101, 'Computer', 90);

OR

Id sid = StudentController.addStudent('Parth', 101, 'Computer');

StudentController.addSubjectMarks(sid, 'Math', 95);

StudentController.addSubjectMarks(sid, 'Java', 88);

StudentController.addSubjectMarks(sid, 'DBMS', 91);

And then click Execute

If error

Setup → Apex Classes → StudentController

Paste

```
public class StudentController {
```

```
    public static void addStudent(String name, Integer roll, String course, Integer marks) {
```

```
        Student__c s = new Student__c();
```

```
        s.Name = name;
```

```
        s.Roll_Number__c = roll;
```

```
        s.Course__c = course;
```

```
        s.Marks__c = marks;
```

```
        insert s;  
    }
```

```
}
```

Click save

Open: Developer Console → Debug → Open Execute Anonymous Window

Paste `System.debug(StudentController.class);`

Paste `StudentController.addStudent('Parth', 101, 'Computer', 90);`

Step 9: go to Setup -> Tabs -> under Custom object tabs click New

- Object -> Student
- Tab Style -> Choose any
- Click Next -> Next -> Save

- Object -> Subject MARKs
- Tab Style -> Choose any
- Click Next -> Next -> Save

Step 10: Setup → **App Manager**

Find your app

Click **Edit**

ADD Students

Save

Can edit subject
